UTILIZATION OF STEAM COMPRESSORS IN THE
EVAPORATING SYSTEM. [1963] 8p. (figs. omitted).
Order from OTS or SLA \$1.10 63-16364

Trans. of Sakharnaya Promyshlennost' (USSR) 1954,
v. 28, no. 3, p. 11-14.

DESCRIPTORS: *Steam, *Compressors, *Evaporators,
Refineries, *Carbohydrates.

Use of steam compressors is effective in all cases,
when vapor from last effect goes into the condenser.
Due to the work of compressors, the consumption of
steam used for the concentration of juice and sirups is
saved at the same or increased density. Use of steam
compressors increases rate of vapor production which
improves performance of the evaporators. Use of com-
pressors in the absence of reserved heat transfer
capacity of first evaporator body permits the increase
(Food, TT, v. 10, no. 8) (over)
